

SHELDON SHAPIRO

Chief Executive Officer

Bio

Sheldon began his construction career as a field helper in 1983 at Shapiro & Duncan and rose through the ranks from Project Manager to Director of Operations and then Vice President/Project Executive. In 2008, he became the Chief Executive Officer of Shapiro & Duncan. In this position he helps guide the future of the company through leadership training, professional development, team building and community outreach activities. Additionally, he has oversight of the Accounting and Construction Departments. His passion is the construction industry and the training and educating of his people, providing them with every opportunity for advancement.

Sheldon has long been actively involved in construction industry associations such as the Associated Builders and Contractors Metro (ABC) (Board of Directors), the American Subcontractors Association Metro Washington (ASA), (President), the Washington Building Congress, the Associated General Contractors, and community outreach such as Junior Achievement, the Building Museum Big Build and ABC Leadership Development. Currently, he serves as a Board Member on the DC Students Construction Trades Foundation and ABC Metro Washington Craftmasters. He is also committed to the University of Maryland Mechanical Engineering Department where he has funded a Shapiro & Duncan Scholarship Endowment which has helped dozens of women and minority students fund their education. The Vistage CEO Peer program has served Sheldon in his professional development and provided him with the opportunity to assist his peer group members in their growth.

Sheldon received his Bachelor of Science in Fire Protection Engineering from the University of Maryland.

Shapiro & Duncan, Inc., strives to be the "Mechanical Solutions Provider of Choice" for commercial, government and institutional customers in the DC Metropolitan area who require the highest level of quality and performance, on-time delivery and top-flight customer service for mechanical construction, design-build and design-bid-build projects whether large or small. A third generation family business, Shapiro & Duncan draws on a 38 year track record of dependability and innovation that has enabled the company to deliver consistently high value and extended infrastructure life-cycles to its customers. The company provides sophisticated mechanical solutions driven by an advanced Building Information Modeling (BIM) process. At the same time, the company's state-of-the-art fabrication shop promotes sustainability by precisely fabricating and assembling mechanical piping configurations with almost no waste.

Shapiro & Duncan, Inc. has a staff of over 350 employees, and has completed more than 2,000 mechanical projects worth more than \$1 Billion. With a \$100 million annual construction volume, Shapiro & Duncan's core markets include commercial, healthcare, technology, institution, government, high-rise residential, education, sports, hospitality and transportation. Shapiro & Duncan was recently awarded their largest (\$55 million) contract to date, the \$55 million INOVA Women's and Children's Hospital.
